

Westcoast SCI is a company looking to change the way healthcare services are provided. We value people's unique skills and education and want your personality to shine through. We are a low-volume clinic that strives for the ultimate customer experience from the initial phone call to the exercise instruction and discharge. Work/life balance, flexible schedules, clinical in-services, education allowance, and clinical mentorship allow us to help you grow as a person and make our team better.

We want you to be a dynamic and engaging individual who is able to adapt your communication to the client in front of you. We take pride in delivering quality care that includes collaboration with the patient as a crucial part of the treatment plan. You will work closely with a team of skilled physiotherapists in a culture that values growth and learning from one another.

We are looking to bring on a Registered Kinesiologist to work with patients in the clinic. Responsibilities include initial assessments, working with ICBC/ Worksafe and private paying patients, charting through Jane, and individualized program design that is specific to client goals.

The afternoon/evening part time position we are hiring for is likely to build up quickly, as we have a high demand, and will have the opportunity to increase to full time hours. Experience with complex clients including concussion and chronic pain is an asset.

We are looking to start training the new candidate at the end of July or early Aug.

Salary starting from \$27.5/hour as an employee.

Requirements:

- Bachelor's Degree in Kinesiology
- Registration with BCKA
- Excellent Communication Skills
- The candidate must demonstrate a willingness to learn, be coachable, and eager to participate in a team culture that values lifelong learning.

Please email your resume and a brief cover letter explaining why you would be an ideal candidate for the position to info@westcoastsci.com.
