

Westcoast SCI Physiotherapy is a team of expert generalists and specialists who support a culture of working and learning together to achieve a better patient experience and outcome. We emphasize an evidence-informed active approach, patient education, and use modalities such as manual therapy, dry needling and electric modalities when they are indicated; we do not believe in a passive approach to physical therapy or creating patient dependence. We work closely with our kinesiologists to get our clients more resilient than when they walked in the door, and back to living life to the fullest. Our fully equipped gym spaces allow us to work with our clients to return to whatever endeavour they set their goal on; be it full contact sport, raising young children, physical employment or maintenance of strength for life. We use a biopsychosocial model to address health holistically, building resilience, self-efficacy and striving for the highest quality of patient care.

Mentorship, educational in-services and continuing education allowance assures that our therapists share knowledge and get an opportunity to grow their skill set. We have a diverse staff with a wide range of backgrounds who understand that working as a team will make us a better clinic as well as help our clients reach their full potential. At Westcoast SCI, our team is also our work family and we strive to take care of each individual as such. Work/life balance is who we are. We value our team and our workplace culture. We also offer our full-time employees extended health benefits.

We are looking for a Part time or Full-time physiotherapist to join our busy Port Coquitlam clinic. We want growth-oriented physiotherapists that want to continue learning, have a passion for elevating the standards of care for everyone, and to consistently aim to be better, now and for future generations. If this sounds like an interesting opportunity for you, please contact us.

Please email your resume and a brief cover letter explaining why you would be an ideal candidate for the position to info@westcoastsci.com.
